**ClientCube Desktop Control Unit
4 Port or 8 Port DCU Switch**

IDEAL FOR:

- State & Local Government
- Department of Defense
- Military
- Command & Control Centers

Part Number	Part Description
G0900322	Secure DCU for ClientCube NET-4
G0900323	LCD Secure DCU for ClientCube NET-4
G0900394	Advanced Secure LCD DCU for ClientCube NET-8

KEY FEATURES

Number of Computers

Up to 8

Display

320 x 240 (RGB)

White LEDs with software-controlled dimming

KVM Interface

RJ-25 jack (6ft RJ-25 DCU Cable supplied)

Optional 50 ft. (16m) DCU cable available

Other Interface

AUX controller cable

USB to Mini-USB Type A connector cable

Unlock SD card

TECHNICAL SPECS

Weight

Gross: 0.55 lbs. (0.25 kg.)

Temperature

Office/Operating: 32° to 104° F (0° to 40° C)

Storage: -4° to 140° F (-20° to 60° C)

Humidity: 0% - 80% RH, non-condensing

Dimensions

Device: 5.51 (W) x 3.54 (D) x 4.34 (H) inches

Display: 3.1 inch

LCD Active Area: 1.9 in x 2.5 in

Power

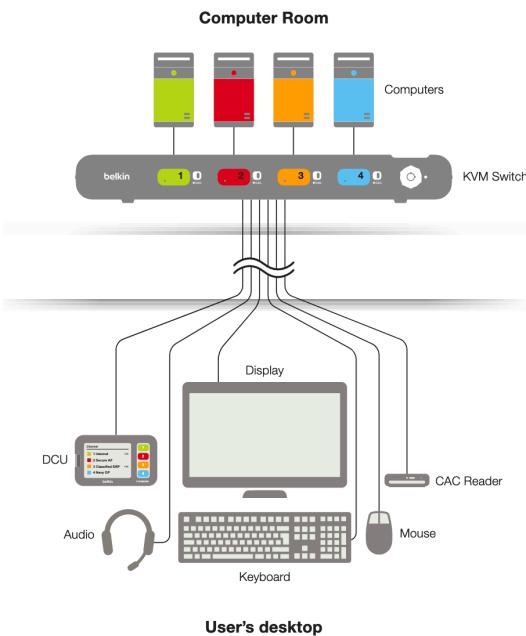

5V DC, 1A (maximum) power from connected Secure KVM Switch

Physical Characteristics

Impact-resistant ABS plastic

Security

Common Criteria EAL 4+

Rear View

➡️ INSTANT ACCESS TO MULTIPLE NETWORKS AND RESOURCES

The Secure DCU is a secure remote control device for the ClientCube NET-4 and NET-8 solutions. It enables operators to easily switch devices, even if the ClientCube is located up to 50 feet away.

EASY TO USE

Customize and program the channel name and color for each computer that you connect. The DCU provides clear indicators of the selected channel through port numbers to reduce mistakes. Support network names come available in US English, GB English, German, French, and Spanish. The color LCD display has an adjustable backlight to adapt to the room environment.

Distribute multiple configurations to several different DCUs by saving and loading them from an SD card. Advanced settings are locked to prevent unauthorized access.

ERGONOMIC AND CONVENIENT

The DCU allows the KVM to be moved off the desk and preserves switching control and security up to 50 feet away. The DCU disables functionality from the KVM's front panel and eliminates the potential for erroneous switching. The DCU is ideal for highly secure environments where the user is allowed access to only the keyboard, mouse, display and DCU. All computer hardware, connections and communication can be located up to 50 ft. away from the user.
